

Claim 1, line 9 change "provisos" to -- proviso --.

Claim 1, lines 10-11 delete "and one of A or B is other than hydrogen when R₃ is -CH₃".

Claim 5, line 1 delete "or 4".

Claim 6, line 1 delete "or 4".

Claim 7, delete "or 4".

Claim 8, line 1 delete "or 2".

Claim 10, line 1 delete "or 2".

Claim 11, line 1 delete "or 2".

Claim 13, line 1 delete "or 2".

Claim 14, line 2 after "comprising" insert -- an effective antiallergic amount of --.

Claim 14, line 2 delete "or 2".

Claim 15, line 4 delete "or 2".

REMARKS

For the most part, the amendments to the specification above involve the correction of obvious errors and a detailed comment should not be necessary except with regard to a few specific items. Thus, the deletion of structural formula from page 11 simply involves the elimination of some extraneous material which does not contribute to the disclosure of the invention. The insertions on page 13, line 17-18 and page 21, line 18 both involve the same general procedure and it should be clear that the amendments merely serve to rephrase the procedure to avoid an awkward description of the process.

On page 21, line 11 it should be obvious that lead tetraacetate was intended by reference to page 13, line 9 of the general disclosure.

On page 24, the title for Example 8 was changed to indicate the compound actually obtained in the Example.

Finally, on page 25, line 17 it should be obvious that the name of the referenced compound from Example 2 was omitted.
